## PROFESSIONAL WORK EXPERIENCE

### Software Engineer

#### Capgemini Technology Services India Pvt. Ltd.

11/2022 - Present

Navi Mumbai, Maharashtra.

##### Achievements/Tasks

- Incorporated with design and development team for one of our clients in which we are building Tax Filling website using Java-based technologies[Java, Spring Boot, RESTful API, JSP, Servlet].
- Engineered a cutting-edge application enabling users to input financial details, calculate tax liabilities, and seamlessly submit tax returns, currently in final stages of implementation before going live.
- Implemented system generates required tax forms based on their financial data and filling requirements where users can upload supporting and relevant documents necessary for tax filling.
- Contributed with senior team members and leads in requirements analysis, High level, Low level design and complex code development for this project.
- Participated in code reviews of application ensuring that all code compiled 100% with coding standards and best practices.
- Attended 100+ stand-ups, sprints and retrospective meetings to receive weekly tasks and mentorship from Senior developers for effective communication and project coordination.

## PERSONAL PROJECT

### E-Commerce Website (04/2022 - 06/2022)

- Created responsive and mobile friendly e-commerce website like flipkart that provides users with an intuitive interface to browse, search, purchase, and review products, along with features such as secure payments.
- Developed website allows users to register accounts and log in securely using email/password authentication.
- The website has a huge product catalogue and listing with different categories like electronics, fashion, house appliances, books etc. with all the pictures, descriptions, prices and customer reviews.
- Registered users can add products to their shopping carts and proceed to checkout seamlessly.
